# AUTHOR INDEX TO VOLUMES 51–70 (1963–1982)

## INCORPORATING A COMPLETE INDEX TO BIOLOGICAL FLORA ACCOUNTS

Compiled by R. S. Clymo with help from O. Clymo, P. Clymo, D. Lambert and A. Mohammed.

The main purpose of this Index is to allow the user to locate a particular article as quickly as possible given the name of any one of the authors (or the only author).

Author entries are in the general form:

**Author** Date (Co-authors, if any) **Volume** First page Short title.

*Most of the titles are abbreviated* to save space.

Volume 52 contains the Jubilee Supplement which is paginated separately. Articles in this supplement are shown as in Vol. **52***.

Biological Flora accounts are indexed by Latin name only.

Copies of chronologic, systematic, alphabetic (Latin name) and alphabetic (English name) indexes for Biological Flora accounts may be obtained from R. Caddel, Science Library, The University, Durham.

Copies of a full (author and subject) index for Vols 21–50 (1933–1962) may be obtained from Blackwell Scientific Publications, Osney Mead, Oxford, OX2 0EL.
